Universe Creator Certificate

TSAKIROPOULOS PANAGIOTIS

During the course, the graduate learned the basic Unity tools for designing game levels in 2D and 3D, mastered working with object animation, and learned how to implement game mechanics using C# code. The graduate also learned how to work with such game design tools as design document, game level scheme and mood board. As a result, the graduate created five games in Unity in five different genres: clicker, platformer, shooter, racing game, and RPG.

Issued: January 31, 2026

Unity Game Development

Course outline

- 1 Unity Basics
- 2 3D level design
- 3 Video Game Programming in C#
- 4 3D object animation
- 5 2D game specifics. Mobile platform
- 6 Creating a 3D racing game
- 7 Creating a role-playing game in 2D
